Dear Hindmarsh Shire Councilors

Recently the Honourable Russell Broadbent MP, asked for the suspension of the Pfizer and Moderna Covid injections until scientific testing is undertaken, and it is proven whether these shots are indeed safe to be administered.

Following up from this request, Port Hedland Council moved a motion to contact every local councilor in Australia with a request to support the suspension of the Covid shots. As this email was sent before the completion of the Victorian Local Government 2024 elections, you may not have received this correspondence.

We are concerned about the people in the community who have received, or will receive in the future, these tainted injections. We lament those who have had 'medical episodes' or been injured or have experienced what appears to be an untimely demise due to this gene altering DNA therapy.

This experimental injection was mandated upon the population under 'emergency use' which meant that there was not the rigid testing carried out before administration to the population. We believe that there needs to be a pause on the continuing use of these shots until they are fully tested and have undergone long term safety studies.

We look forward to your acknowledgement of this email outlining the steps you will be taking to investigate this issue.

Concerned members of the community

Terry & Lois Miller
